

## RIBOKS AC FRY

### COMPLETE MIX FOR JUVENILE AFRICAN CATFISH BREEDING

RIBOKS AC FRY is a food that is used for juvenile fish breeding weighing up to 50 gr. The food was developed according to the latest knowledge in this field with specially defined nutritional requirements combined with a modern way of thinking in farm conditions. Produced with a very gentle technique that gives us a product with excellent physical characteristics without the presence of dust. The granules float for some time, slowly sinking, which allows maximum utilization of food without waste and blurry water. This food is the answer to both safe fish farming and its immune system, all in intensive cultivation conditions.

Granulation		Powder	1,5	2 mm
Crude protein	%	64	64	64
Crude fats	%	9	9	9
Fibers	%	4	4	9
Ash	%	12	12	12
Phosphorus	%	1,4	1,4	1,4
Total energy	(MJ)	20,1	20,1	20,1
Digestible energy	(MJ)	18,7	18,7	18,7

The raw material content is listed in alphabetical order. The complete content is displayed on the packaging declaration.

Wheat flour, wheat gluten, fish flour, fish oil, hemoglobin, chicken meat flour, yeast, soybean oil, spc, vitamins and minerals.

Fish grammage	Granulation	meal according to water temperature						
		14°C	18°C	20°C	22°C	24°C	26°C	28°C
Riba (g)	mm							
1,5-10	powder	0,9	2,5	3,8	4,8	5,6	6,2	5,55
10-30	1,5	0,75	2,1	3	3,8	4,5	5	4,6
30-50	2	0,7	1,8	2,7	3,15	3,8	4,5	3,74

The amount of food as a percentage relative to the ichthyic mass.  
The feeding table is approximate and is based on optimum production conditions.
