

RIBOKS AC GROVER

COMPLETE MIX FOR AFRICAN CATFISH BREEDING

RIBOKS AC GROVER is a food that is used for African catfish breeding and fattening. Adapted energy content allows adjusting to different production conditions. An appropriate balance between the levels of fat and protein and all the nutritional requirements that can be seen during the breeding period. All the components used make it possible for the food to have good taste, resulting in excellent consumption and growth. The economic feasibility of this line is unquestionable and brings benefits to the user, and ensures the quality of the meat.

Granulation		2 mm	3 mm	4 mm	6 mm
Sirovi protein	%	45	42	42	42
Sirove masti	%	20	12	12	12
Vlakna	%	2	3	3	3
Pepeo	%	6	7	7	7
Fosfor	%	1	0,9	0,9	0,9
Ukupna energija	(MJ)	21,9	19,8	19,8	19,8
Svarljiva energija	(MJ)	18,9	16,7	16,7	16,7

The raw material content is listed in alphabetical order. The complete content is displayed on the packaging declaration.

Wheat flour, wheat gluten, fish meal, hemoglobin, chicken meat flour, yeast, soybean oil, spc, vitamins and minerals.

Fish grammage	Granulation	meal according to water temperature						
		14°C	18°C	20°C	22°C	24°C	26°C	28°C
Fish (g)	mm							
50-150	3	0,55	1,5	2,15	2,8	3,15	3,7	3,2
150-500	4	0,42	1,1	1,5	1,8	2,15	2,31	2,17
500-1500	6	0,38	0,69	1,1	1,25	1,42	1,51	1,45

The amount of food as a percentage relative to the ichthyic mass.

The feeding table is approximate and is based on optimum production conditions.
