

SEMI INTENSIVE 32/10

COMPLETE MIX FOR JUVENILE CARP BREEDING

SEMI INTENSIVE is a food that is part of a specialized and recognizable RIBOKS line. 32/10 is primarily intended for the cultivation of a one-year-old juvenile carp. Since it is perfectly balanced, it allows an increased intensity of breeding with a uniform weight of the individual fish. It is made with extremely good physical characteristics that result in maximum utilization. It gives an immune response to the state of the organism, which allows a very high percentage of survival. It has been used for faster increase in weight in older carp categories.

Granulation		2,5 mm	3 mm	4 mm
Crude protein	%	32	32	32
Crude fats	%	10	10	10
Fibers	%	5,5	5,5	5,5
Ash	%	7	7	7
Calcium	%	1,2	1,2	1,2

Total energy	(MJ)	18,7	18,7	18,7
Digestible energy	(MJ)	15,2	15,2	15,2

The raw material content is listed in alphabetical order. The complete content is displayed on the packaging declaration.

Ddgs, corn, hemoglobin, wheat, pap, wheat flour, fish flour, fish oil, soybean cake, soybean oil, sunflower meal, vitamin and mineral mix.

User manual:

Feeding should be carried out exclusively at marked nourishing sites that are determined depending on the type of food (floating, sinking). The amount of daily meals is determined by the size of the facility, the density of the plantations and the amount of natural food in the facility.
